PROFESSIONAL PROFILE

Fullstack Developer with over 2 years of experience building and delivering technology solutions in production for real clients. Hands-on expertise in React, TypeScript, and PostgreSQL, complemented by Java, Spring Boot, and Python. Proven ability to interpret functional requirements, understand the client's business context, and translate them into concrete technical solutions. Has independently led the full development cycle: from requirements gathering to deployment and production support. Focused on clean code, testing, and continuous improvement.

PROFESSIONAL EXPERIENCE

Fullstack Developer - Client Projects in Production

Nov 2025 – Present

Client 1 — StockBeauty App (desktop application, actively in production)

- Gathered, interpreted, and translated the functional requirements of a business consultancy into a complete enterprise management application: **inventory control, point of sale (POS), and executive reports module**.
- Built the **frontend with React + TypeScript** implementing dynamic themes, multilingual support (i18n), configurable sidebar, and a POS interface with automatic calculations and receipt generation.
- Designed the backend with Rust/Tauri following a Commands → Services → Repository pattern with **SQLite**, delivering real-time monitoring, sales traceability, and multi-format export (PDF/Excel).
- Application **actively in production** since Nov 2025 with a 12-month support contract and continuous iterations based on client feedback.

Client 2 — Professional Website (in development, upcoming production deployment)

- Development of a professional website applying performance best practices, technical SEO, and responsive design oriented toward the client's business results.

Java Developer - HITSS México

Feb 2025 – Jun 2025

- Designed and implemented **REST API** services with Java and Spring Boot, **covering 100% of the functional requirements** approved in technical review.
- Executed unit and integration tests for endpoints with Postman, ensuring data integrity and eliminating errors before each delivery.
- Participated in full Scrum cycles (stand-ups, code reviews, retrospectives), increasing **delivery flow efficiency by 30%**.

- Built frontend and backend features for an educational platform adopted by over **300 active students**, interpreting functional requirements from the teaching team.
- Integré servicios externos mediante **REST APIs**, reduciendo un **40% los tiempos de consulta** y ampliando compatibilidad multiplataforma.
- Identified and fixed UI bugs, increasing retention by **25% during pilot testing**.

Backend Developer - Universidad Autónoma de Chiapas

Jul 2022 – Nov 2023

- Implemented an access control system with **Java and PostgreSQL**, processing over **500 monthly entries** without incidents.
- Optimized SQL queries reducing response times by **35%** and managed the project lifecycle with Git and Jira.

PROJECTS

StockBeauty App | [StockBeauty](#) | Stack: React, JavaScript, Rust/Tauri, SQLite, i18n

- Complete enterprise system (POS + inventory + reports) for a real client. In production since Nov 2025 with active support.

Web Portfolio | [Portafolio](#) | Stack: JavaScript, HTML5, CSS3, Vercel

- Personal site showcasing projects and tech stack. Continuous deployment from GitHub.

TECH SKILLS

Frontend: React, TypeScript, JavaScript(ES6+), Vite, HTML5, CSS3

Backend: Python, Java (Spring Boot), Rust(Tauri), REST APIs

Databases: PostgreSQL, SQLite, MySQL

Cloud & DevOps: GCP (basic), Docker (basic), Vercel, Git,

Testing: Unit Testing, Integration Testing, Postman

Methodologies: Scrum, code review, technical documentation

EDUCATION

B.Sc. in Software Development and Technology Engineering — Universidad Autónoma de Chiapas

Graduated. Focus on software architecture, databases, and web application development.

LANGUAGES

Español: Native | **English:** B2 — Upper-Intermediate (conversational, fluent technical reading)
